Branch: Computer Engineering

Division: C

Assignment No 1

Title : Create a static web page which defines all text formatting tags of HTML in tabular format.

Objectives:

- To understand different HTML text formatting tags
- To learn how text can be styled and emphasized using HTML
- To represent information in a clear tabular format
- To design a basic static web page using HTML only

Outcomes:

- Identify various HTML text formatting tags
- Explain the purpose of each formatting tag
- Use formatting tags to enhance text appearance
- Create a simple static HTML webpage
- Present technical information in a structured table

Theory :

HTML (HyperText Markup Language) provides several text formatting tags that help in improving the readability and presentation of content on a webpage. These tags allow developers to make text bold, italic, underlined, highlighted, small, deleted, inserted, and more.

Text formatting tags are mainly used to:

- Emphasize important text
- Improve visual clarity
- Convey meaning to users
- Structure content professionally

Code :

```
<!DOCTYPE html>

<html lang="en">

  <head>

    <meta charset="UTF-8" />

    <meta name="viewport" content="width=device-width, initial-scale=1.0" />

    <title>Assign 1</title>

    <style>

      table {

        font-family: Arial, sans-serif;

        border-collapse: collapse;

        width: 50%;

        text-align: center;

      }

      th,td {

        border: 1px solid black;

        padding: 8px;

      }

      th {

        background-color: #b9b5b5;

        font-size: 20px;

      }

      tr:nth-child(even) {

        background-color: #e1f6fd;

      }

      body {
```

```
display: flex;

justify-content: center;

align-items: center;

flex-direction: column;

}

</style>

</head>

<body>

<h3

style="

text-align: center;

font-size: 30px;

font-family: Cambria, Cochin, Georgia, Times, 'Times New Roman';

color: rgb(48, 15, 2);

"

tex

>
```

HTML Text Formatting Tags

```
</h3>

<table>

<tr>

<th>Tag</th>

<th>Description</th>

<td><ins>Inserted</ins></td>

<td>Click here for more details
</td>

</tr>

<tr>

<td><sub></td>

<td>Subscript text</td>

<td>H₂O</td>

<td>Click here for more details
</td>

```

</tr>

<tr>

<td>&lt;sup>&gt;</td>

<td>Superscript text</td>

<td>E = mc<sup>2</sup></td>

<td><a href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/sup" >Click here for more details
</a></td>

</tr>

</table>

</body>

</html>

```

Output :

HTML Text Formatting Tags

Tag	Description	Example Output	Link
	Defines important text	Strong	Click here for more details
<i>	Italic text	<i>This text is italic</i>	Click here for more details
	Emphasized text	<i>Emphasized</i>	Click here for more details
<u>	Underlines text	<u>This text is underlined</u>	Click here for more details
<mark>	Highlighted text	This text is highlighted	Click here for more details
<small>	Smaller text	This text is small	Click here for more details
	Deleted Text	Deleted	Click here for more details
<ins>	Inserted text	<u>Inserted</u>	Click here for more details
<sub>	Subscript text	H ₂ O	Click here for more details
<sup>	Superscript text	E = mc ²	Click here for more details

Conclusion :

In this assignment, we studied different HTML text formatting tags and their uses. By creating a static web page, we learned how these tags help in changing the appearance of text such as making it bold, italic, underlined, highlighted, small, deleted, or superscript/subscript. Displaying the tags in tabular format made the information clear and easy to understand. This assignment helped us improve our basic HTML knowledge and understand how text formatting enhances the readability and presentation of web pages.
